Appliance Rebate Program

Central Electric Cooperative (CEC) is offering rebates to members for installing Energy Star rated appliances that promote efficiency while improving our environment. Rebates are available for the following qualifying appliances:

- Heat pump (any type): \$200
- Refrigerator: \$100
- Freezer: \$50
- Clothes washer: \$50
- Clothes dryer: \$50
- Dishwasher: \$25
- Window air conditioner: \$25
- Dehumidifier: \$25
- Mini compact refrigerator: \$25

Member Requirements

- Qualifying appliances must carry the Energy Star logo to be eligible. To verify Energy Star status visit www.energystar.gov.
- Members must complete the CEC Rebate form available at www.central.coop under the Energy Savings tab.
- Mail rebate form and a copy of the appliance sales receipt to the address provided on the form.
- Limited to one rebate per appliance per member account each calendar year.
- Allow up to six weeks for rebate check processing.

Rebate funds are available from renewable energy credits earned by our power supplier's renewable generation assets. Program funding is limited and subject to change or cancellation without notice.

About Energy Star

Energy Star is a program launched in 1992 by the U.S. Environmental Protection Agency and U.S. Department of Energy. In order for appliances to earn the Energy Star label products must be third-party certified based on testing in EPA-recognized laboratories. In addition to up-front testing, a percentage of all Energy Star products are subject to “off-the-shelf” verification testing each year. The goal of this testing is to ensure that changes or variations in the manufacturing process do not undermine a product's qualification with Energy Star requirements.

Why Energy Star Exists

Significant opportunity for climate change mitigation exists from helping consumers and businesses save energy. Energy use in homes, buildings, and industry account for two thirds of greenhouse gas emissions in the United States. Energy Star has been instrumental in reducing this energy use in order to realize significant greenhouse gas (GHG) emission reductions — contributing to important health and environmental benefits by addressing the challenges of climate change while strengthening our economy. Energy Star benefits have grown steadily over time, nearly tripling in the last decade.

Contact CEC at 800-521-0570 or visit www.central.coop to learn more.

Why Upgrade Your Appliances

Inefficient appliances can have a huge impact on your home's monthly electric bill. Replacing a refrigerator made before 1993 with a new, Energy Star-rated model could knock \$65 to \$100 off your power costs each year. Appliances already use 13 percent of your home's electricity, and older appliances drain even more. A refrigerator from the 1970s costs \$200 more to operate every year than a current model; a 1980s fridge isn't much better, wasting \$100 in energy dollars annually.

How to Decide on an Appliance

Touchstone Energy® Cooperatives' website, www.TogetherWeSave.com, demonstrates how small changes like replacing an appliance or unplugging electronics lead to big energy savings. On the website under “Add Up Your Savings,” you can walk through a typical home's kitchen, living room, and other common areas. Upgrade appliances and make other energy-smart choices in each room. Each time you make a change, you're shown how much money you could save on your annual electric bill.

Rebate forms available at www.central.coop.
